

## Warm Handoff

During ED Initiation

Recovery Coach

Patient

When paged for bedside consult, use a **handout** to **educate** patient on how to take buprenorphine.

After second dose, return to determine if patient is **amenable** to continuing treatment.

Before Discharge

If possible, schedule **next-day** (or soonest) **appointment at in-system MAR** clinic in patient's neighborhood.  
If not possible, schedule next-day (or soonest) appointment at out-of-system MAR clinic and obtain patient's **release of information**.

Address **barriers** (travel, insurance, etc.) to attending after-care appointment.

Next Day

Recovery Coach

Remind patient of appointment.

Check later to **determine if patient attended** and note in chart.

Patient  
Outpatient MAR Provider

If **no-show**, attempt to re-engage patient to attend an appointment. Address barriers again.
